

# B6

## B6 Seat Dimensions

The B6 is bottom mounted as standard. To fit TR1 runners, as shown above, you need the TR1/B6 fitting kit as the runners have to be spaced away from the lower seat surface.

The standard B6 seat can be specially ordered with a side mount option. It can then use the TBF1, TB F5 and TB FIA brackets. The side mounted version can also use the EB4 and EB5 Lotus Elise/Exige brackets.

For a 8855-1999 homologated FIA version order the B6 Screamer.
